

To introduce the Green Map Site Marker System to the Revelation to Action jury and all who interact with this contest, we sketched some initial Marker concepts

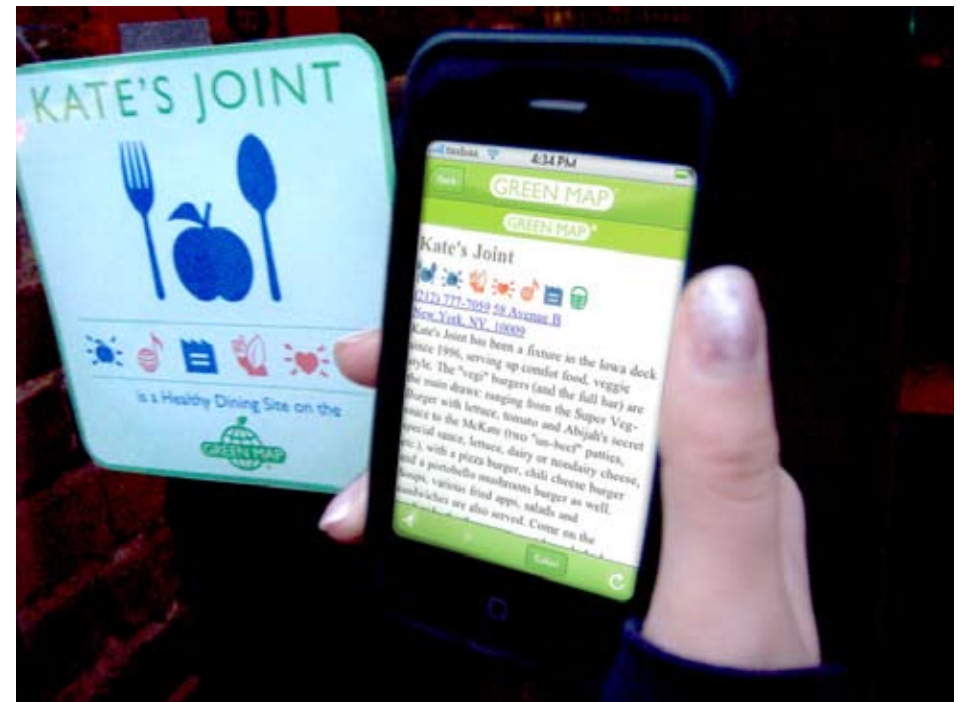

Two sketches were tested
on the front window of a
local New York healthy café

Using a mobile phone, the public can opt to locate the green site's Overview online, directly from the Open Green Map social mapping platform

Note: the Overview is actualized*, but the mobile 'bridge' between the Marker and Open Green Map has not been built, nor can the public interact with the online platform.

* Use the beta version by typing GreenMap.org into any mobile phone's browser. Download version 1.0 of the Green Map iPhone App in the Apple store - both are free.

As illustrated in this sketch, our Marker proposal includes an option digital linkage so people can use a mobile phone to add viewpoints, ratings, images, videos, and impact assessments to the green site's profile on the Open Green Map platform.

Our proposal includes on-site signage and take away cards, etc., to help people understand the full importance of each green site.

Green Map Site Marker
System sketches - 2010
